Art Unit: 3724

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 2 and 6, drawn to a pin kit having a fixation member, classified in class 83, subclass 875.
 - II. Claims 3 and 4, drawn to a pin kit having height adjusting bolts, classified in class 83, subclass 699.61.
 - III. Claim 5, drawn to a pin kit having magnets, classified in class 83, subclass 698.21.
 - IV. Claims 7,8 and 11, drawn to a pin kit having a slanted buffer plate and joggles, classified in class 83, subclass 701.

Claims 1, 9 and 10 will be examined with the elected invention.

2. Claim 1 links the inventions of groups I-IV. The restriction requirement of the linked inventions is subject to the nonallowance of the linking claims, claim 1. Upon the allowance of the linking claims, the restriction requirement as to the linked inventions shall be withdrawn and any claims depending from or otherwise including all the limitations of the allowable linking claims will be entitled to examination in the instant application. Applicant(s) are advised that if any such claims depending from or including all the limitations of the allowable linking claim(s) is/are presented in a continuation or divisional application, the claims of the continuation or divisional application may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Where a restriction requirement is

Art Unit: 3724

withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

3. Inventions of groups I-IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. For example, the pin kit having a fixation member of group I could be used without the height adjusting bolts of group II, and conversely, the pin kit having height adjusting bolts of group II could be used without the fixation member of group I. See MPEP § 806.05(d).

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ken Peterson whose telephone number is 703-308-2186. The examiner can normally be reached on Monday thru Thursday between 7am and 4pm. If attempts to reach the examiner are unsuccessful, the examiner's supervisor, Allan Shoap can be reached on 703-308-1082.

In lieu of mailing, it is encouraged that all formal responses be faxed to 703-872-9302. Any inquiry of a general nature or relating to the status of this application should be directed to the receptionist whose telephone number is 703-308-1148.
